

New Mexico- Tuesday, Congressman Harry Teague announced that the city of Las Cruces has been awarded funding to help grow the city's transportation resources. The grant, allocated by the Department of Transportation through the Federal Transit Administration, will allow the city to purchase four new Para-Transit vans. The vans will replace the current aging or outdated vehicles.

"Many of my constituents must travel long distances for every day needs – work, medical appointments, to visit family - and depend on public transportation to get them there. And it's imperative that we make transportation services available and accessible to everyone" said Congressman Harry Teague. "I am pleased that this targeted investment will offer many southern New Mexicans dependable and safe solutions to their transportation needs."

Para-Transit vans provide a reliable, public transportation service that accommodates those with disabilities.
